FullStack Developer with 2+ years of experience specializing in e-commerce development at Dango Digital. Proven expertise in building and optimizing multiple Shopify-based online stores using Liquid templating, JavaScript, TailwindCSS, and modern frontend frameworks. Experienced in collaborating with cross-functional teams to deliver high-performance e-commerce solutions and WordPress sites using PHP.

Strong foundation in React, Redux, Next.js, and Node.js with hands-on experience in both frontend and backend development. Known for creative problem-solving abilities, excellent team collaboration, and effective communication during sprint planning and project execution. Passionate about clean code, responsive design, and creating engaging user experiences. Continuously learning and adapting to new technologies while maintaining a focus on delivering efficient, scalable solutions.

TECHNOLOGIES

HTML, CSS, Javascript, React, Redux, Node.js, Express, Postgres, Sequelize, Liquid, PHP, Scrum.

PERSONAL PROJECTS

Full Stack Web Developer – InstaBlogs

- InstaBlogs emerged from a design course completed by a colleague. This application was created specifically for freelancers' needs, providing them with a dedicated space to share their valuable experiences, ideas, and questions through interesting blogs and posts. Within this vibrant community, freelancers can connect with their peers, fostering meaningful discussions and exchanging knowledge. Other users are encouraged to actively participate by commenting and responding to posts, creating a collaborative environment where everyone can learn and grow together.
- The application was developed using NextJS, Tailwind, Prisma, and MongoDB.

Full Stack Web Developer – Videogames App

Henry Bootcamp, Buenos Aires, Argentina | Mar. 26 2022 - Apr. 11 2022

- Design and develop a video games app that included: searches, filtering, sorting, and creation
- Develop the app using React, Redux, pure CSS for the Frontend and Backend developed in Node.js with Express. Database in PostgreSQL and Sequelize.
- Repository
